MIDWEST half-sister Emma 2 iac.

MIDWEST dam Eva 3 iac.

The genomic Fleckvieh sire MIDWEST combines with Mint x Everest x Vanstein x Rochen solely highly positive proven Fleckvieh bulls in his pedigree. Due to the bull Busserl, from the Midwest great-grandmother Betti, the dam's side can refer to a positive tested sire, as well. The enormously deep-ribbed Midwest dam Eva shows a lot of capacity and excites with her milk performance at enormously high fat contents of av. 4.90%. From her, the first daughter has already calved, and with an initial test milking of over 35kg of milk, she seems to follow in her mother's footsteps. Other half-sisters of the Midwest mother underpin the inheritance picture of this Fleckvieh cow family impressively. MIDWEST your choice for performance, fitness and conformation at a high level.
