FLECKVIEH WALINT dam Geno 1.lac.

WALINT is currently one of highest genomic young sires in the Fleckvieh breed concerning TMI. He derives from the cow family of our reliable production Fleckvieh sire Everest. His dam Geno a Mint-daughter unifies high performances and best type. His grand-dam Glucke has several sons at A.I and his great-granddam Glocke is the dam of the progeny tested Humpert-son Humphrey. Walint can rely on an enormous wide and well-proven cow family, that can convince with both bulls and daughters milking on several farms. The young Fleckvieh Sire Walint promises the ideal dual-purpose type on a very high level with more than +1.000kg milk and excellent beef performance. Additionally he impresses with great figures for the functional traits and udder composite.
