Fore udder length	108	short							long
Rear udder width	115	narrow							wide
Rear udder height	121	low							high
Susp. ligament	113	weak							strong
Udder depth	116	deep							shallow
Fore udder attachment	105	loose							tight
Udder balance	100	staged							inclined
Teat length	105	short							long
Teat thickness	91	thin							thick
Teat placement (front)	108	wide							close
Teat placement (rear)	106	wide							close
Teat direction (rear)	102	outwards							inwards
Udder cleanness	105	add. teats							clean udder

Brown Swiss: VIGOR Noris 3.lac.

VAVIGO comes from the well-known Brown Swiss cow Noris of the Kohn farm and optimally combines best performance with outstanding conformation. The daughters show a lot of frame and convince especially in the udder composite. The udders are high and well attached, with the best length and width and are held by a strong central ligament – dream udders par excellence! But the foundations are absolutely correct, as well. The slightly steeper legs of his daughters are equipped with strong pasterns and high claws. Best udder health and very good daughter fertility complete his pictures.
