Teat direction (rear)	114	outwards			█				inwards
Udder cleanness	105	add. teats			█				clean udder

HENNESSY is one of the best Fleckvieh bulls in the organic index. He derives from the widespread H-cow family of the farm Aidelsburger, which could already produce bulls such as Manitoba and Round up. But also conformation strength is deeply anchored in this cow family. Hennessy dam Haba delights with fine feet&legs and a very well attached udder, which leaves nothing to be desired in terms of teat position and placement. The characteristics of the cow family are also reflected in the genomic breeding pattern of Hennessy, who convinces with fitness and conformation!
