Teat placement (rear)	109	wide							close
Teat direction (rear)	108	outwards							inwards
Udder cleanness	106	add. teats							clean udder

Emma, daughter of Assay

Quali, dam of Assay

The udder specialist ASSAY was bred on the farm of Michael Müller / Bad Wurzach, who is in the process of restocking his dairy cows from 180 to 250. As young cow the dam of Assay, the Payssli-daughter Quali impressed with breeding values of 130 for udder and 124 for feet & legs. Thus she was one of the young cows with the highest genomic breeding values in Europe. Quali is a member of the Q-cow family with Huray, Vinner and Proliner blood. This cow family is famous for its longevity. 6 generations of cows had 5 lactations or more with 1.000kg more milk than the herd average. Assay-daughters will be big framed, long animals with positive milk components. With a final score of 126 and udder of 129 Assay is one of the best type sires without any drawbacks regarding milk production.
